# CRAFTSMANSHIP

---

We pride ourselves on our attention to detail and design expertise. Our dedicated team works to the highest standards crafting beautifully designed and expertly finished products to meet the unique demands of each individual project. From precise stitching of veneers to create our Alto toilet cubicles to moulding elaborate solid surface vanity troughs, the whole

team works to the same exacting standards that our customers have come to expect over the years.

By taking a bespoke approach to design, we're able to tailor our products to suit any specification with a range of unique finishes designed to reflect or complement any style.

At the heart of the Washroom range is a focus on precision and hand craftsmanship.

---

# MANUFACTURING

---

Continual investment in sophisticated CNC technology and manufacturing equipment helps us maintain efficient scheduling, the highest quality of product manufacture and ultimately on-time delivery to site.

Our state-of-the-art five axis Homag CNC machine, which uses the latest CAD software to link seamlessly with

our design department, together with a high-tech laminate press and edgebander, ensures we're able to continue to deliver a quality finish on time, every time.

Full site surveys are undertaken in advance of manufacture to ensure that every detail will translate without compromise, from design on screen to installation on site.

---

# INSTALLATION

---

We fully appreciate the need to work closely and in co-operation with other trades to ensure quality and programme are achieved without compromise.

To this end we only employ experienced installers and project managers who will ensure that installation is undertaken to the highest standards and in complete co-operation with other trades.

Managed from our head office and supervised by dedicated and fully experienced project managers, our installers will work to the highest standards of quality and health and safety to ensure that our products look and perform exactly as promised. We do our utmost to accommodate changes along the way and we are always on hand to answer queries post completion.

Unlike many of our competitors, we not only offer a design and manufacture service, but for total accountability we provide one of the most efficient installation services in the industry.

Washroom  
ROOM  
703000

---

# OFF-SITE SOLUTION

---

Full size mock-ups can be created incorporating exact details to ensure that the final design and manufacture meets fully with the specifiers' intended aesthetic, prior to factory manufacture.

In addition, with programmes becoming more demanding necessitating ever increasing co-ordination of trades in order to meet deadlines, we have invested in additional factory space to enable the manufacture and build of entire washroom units off-site.

Careful on-site surveying by experienced site staff, programming to co-ordinate with other trades and the ability to design and build away from site ensures that build quality is undertaken to the most exacting standards.

The washroom components are subsequently de-constructed, transported to site and assembled in a fraction of the time associated with conventional build.

Just 30 minutes by train from Central London, our extensive manufacturing facility is ideally placed to enable clients to visit, with minimal downtime.

---

# ICONICA BESPOKE

---

The increase in demand for high specification, bespoke common areas and washroom facilities in the London commercial market in particular, has acted as a catalyst for the development of the Iconica collection.

The collection offers an up-specified option to our most popular ranges, incorporating materials not traditionally associated with washrooms.

Materials such as glass walls and doors, acrylic cubicles, glass lockers, deep gloss lacquered doors and

painted glass and anodised aluminium ducting all feature.

With additional options for cubicle doors to be spray-painted to any RAL colour or for digital screen-printed lockers to be incorporated into the design, creating a unique space is simple.

Iconica has taken washroom specification to a new level on some of the most prestigious projects in the City and beyond.

Iconica offers the specifier an exclusive collection of designs, materials and finishes for high-specification commercial washrooms, shower and changing areas.

---

# STOCKED UP

---

We appreciate that careful timing and considered scheduling are vital to deliver projects on time, every time.

Our dedicated storage warehouse, based on site at our manufacturing facility in Essex, is large enough to house all our standard products.

We ensure that stock levels remain consistently high, so that we can meet quick turnaround times for shorter lead projects as and when required.

Utilising a purpose-built CRM system, which automatically re-orders items when stocks hit a certain level, allows us to accurately control all stock and ensures we are never short of standard products.

With consistently high levels of standard stock, sophisticated monitoring systems and space to store bespoke products in advance of installation – you can rely on Washroom to deliver.

---

# SECTORS

---

Over the last two decades, we've continually adapted our offering, developing product ranges tailored to suit a variety of sectors. This continual development process has fuelled our growth by allowing us the flexibility to focus on key sectors at different times.

We have worked on some of the UK's most prestigious high-end commercial

buildings, on both new build projects and large-scale refurbishments, typically for the office sector. Within the sports and leisure sector we've delivered projects for most, if not all, of the UK's major health and leisure clubs. At the same time, we continue to work within the public sector with a specific focus on education, healthcare and secure accommodation projects.

Since 2001 we've excelled in manufacturing and installing high quality innovative washroom products, on schedule and within budget across a wide range of sectors.

---

# A FOCUS ON BIM

---

The majority of our products are available as Building Information Modelling (BIM) objects via the National BIM Library.

Twelve of our most popular toilet, shower and changing cubicles together with our benching units, lockers and solid surface vanities are available to download as component BIM objects ready to be positioned within an existing 3D building model just as

required. In addition, our Concerto integrated duct panel system is now available as a layered BIM object to download in nine different finishes including glass, real wood veneer, granite, laminate and Corian.

Look out for the BIM logo throughout this brochure.

Our design team takes real pride in creating beautifully designed products that clients will want to specify.

---

# ENVIRONMENT

---

We constantly review and monitor our suppliers, products and processes in order to minimise environmental pollution and waste. In addition to recycling our own waste wherever possible, we can also manufacture from a range of recycled materials including a colourful collection of vanities and panels produced from recycled plastic bottles.

Where possible we invest in technologies to improve and enhance the environment we work in and the environment we all inhabit.

For example we recently installed a new state-of-the-art biomass boiler, which runs on wood off-cuts, saving an estimated 52 tonnes of carbon emissions a year. We've also upgraded to a smart dust extraction system which automatically switches on the dust extraction units exactly and only when required – vastly reducing our annual electricity usage. And, to reduce emissions we are committed to investing in increasingly fuel efficient vehicles.

Working closely with regulators and environmental groups, we are committed to protecting the environment wherever we operate.

A photograph of a modern bathroom. In the foreground, a long white vanity with a large mirror is visible. The mirror reflects the room, showing a row of wooden toilet cubicles. The cubicles have a vertical wood grain finish and black handles. The floor is light-colored, and the walls are white with a marble pattern. The text "TOILET CUBICLES" is overlaid in white, bold, sans-serif font across the center of the image.

# TOILET CUBICLES

We've designed our range of toilet cubicles to suit a variety of applications from full height, flush fronted cubicles for offices to low level cubicle doors ideal for early years education settings. Choose from a wide range of materials, colours and finishes for a bespoke design to complement your washroom space.

# YOUR SPACE

**A compact and self-contained cubicle, Your Space offers an excellent alternative to the traditional commercial washroom layout. Each cubicle includes a toilet plus vanity unit and hand-drying facilities - all housed behind a full height door.**

Your Space superloos are an effective space-saving solution while also providing end users with ample space and total privacy.

With a fully customisable specification drawing on our entire product range - we'll create Your Space, your way.

## **Specification**

Specify from the Alto, Alto Laminate, Alto FENIX or Marcato toilet cubicle ranges (see pages 26-27, 30-31, 32-33).

## **Fittings and door furniture**

Standard line stainless steel indicator bolts, Royde & Tucker fall closed hinges, stainless steel coat hook and hydraulic door dampener.

## **Access considerations**

Alto and Marcato cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

## **Vanities**

Specify any from the Arpeggio vanities range (see page 86).

## **Duct panelling**

Specify any finish from our duct panelling range (see page 104).

**Your Space brochure available.**

# ALTO

**Alto provides an unrivaled design statement for areas where luxury and uncompromising style are essential.**

The full height, rebated flush system offers a virtually seamless facade. Finished in real wood veneer, high pressure laminate (HPL), Corian or lacquer, Alto is the ultimate design statement.

**BIM AVAILABLE  
FOR THIS PRODUCT**

## Specification

Pilasters and doors: Manufactured from 44mm chipboard, faced in either high quality real wood veneer or high pressure laminate (HPL). Lipped in matching/complementing hardwood and rebated to create the flush design.

Partitions: Three options available:

**Option 1** Floor to ceiling treated PAR softwood timber frame, laminated where required to create flash gaps with 2 No. panels fitted either side to give an 84mm thick dividing partition.

**Option 2** 12mm MR MDF central dividing panel fitted floor to ceiling with 2 No. panels fitted either side to give a 60mm thick dividing partition.

**Option 3** 2 No. 44mm chipboard panels lipped in hardwood then laminated both sides with either real wood veneer or high pressure laminate (HPL), fitted to floor and ceiling with hardwood splines.

## Fittings and door furniture

d line stainless steel indicator bolts, Royde & Tucker fall closed hinges, stainless steel coat hook and hydraulic door dampener.

## Dimensions

**Height: 3000mm** **Floor clearance: 20mm (door undercut)**  
**Depth: 1500mm - 1800mm**  
**Other sizes are available.**

## Access considerations

Alto cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

# ALTO KRISTALLA

Based on the popular Alto cubicle system, Alto Kristalla has the same rebated edges for a flush facade but with 6mm glass adhered to the face to create a striking, high specification finish.

## Specification

Pilasters and doors: Manufactured from 44mm chipboard, edged in matching/complementing hardwood. Edges are then rebated to create the flush design. Once this is complete, 6mm glass is then bonded to the front facade.

Partitions: Three options available:

**Option 1** Floor to ceiling treated PAR softwood timber frame, laminated where required to create flash gaps with 2 No. panels fitted either side to give an 84mm thick dividing partition.

**Option 2** 12mm MR MDF central dividing panel fitted floor to ceiling with 2 No. panels fitted either side to give a 60mm thick dividing partition.

**Option 3** 2 No. 44mm chipboard panels lipped in hardwood then laminated both sides with high pressure laminate (HPL), fitted to floor and ceiling with hardwood splines.

## Fittings and door furniture

d line stainless steel indicator bolts, Royde & Tucker fall closed hinges, stainless steel coat hook and hydraulic door dampener.

## Dimensions

Height: 3000mm

Floor clearance: 20mm (door undercut)

Depth: 1500mm - 1800mm

Other sizes are available.

## Access considerations

Alto cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# ALTO FENIX

---

**Based on the popular Alto cubicle system, Alto FENIX creates an attractive, virtually seamless facade with a unique super matt surface and is available in 15 colours.**

Soft to touch, thermally self-healing, impact resistant and hydro repellent, Alto FENIX, which also has enhanced anti-bacterial properties, is ideal for washrooms and changing areas where a luxury, high performance finish is required.

## **Specification**

Pilasters and doors: Manufactured from 44mm chipboard, edged in matching/complementing hardwood then faced in Fenix laminate. Edges are then rebated to create the flush design.

Partitions: Three options available:

**Option 1** Floor to ceiling treated PAR softwood timber frame, laminated where required to create flash gaps with 2 No. panels fitted either side to give an 84mm thick dividing partition.

**Option 2** 12mm MR MDF central dividing panel fitted floor to ceiling with 2 No. panels fitted either side to give a 60mm thick dividing partition.

**Option 3** 2 No. 44mm chipboard panels lipped in hardwood then laminated both sides with Fenix laminate, fitted to floor and ceiling with hardwood splines.

## **Fittings and door furniture**

d line stainless steel indicator bolts, Royde & Tucker fall closed hinges, stainless steel coat hook and hydraulic door dampener.

## **Dimensions**

**Height: 3000mm as standard, this can vary depending on design. Floor clearance: 20mm (door undercut) as standard, this can vary depending on design.**

**Depth: 1500mm - 1800mm**

## **Access considerations**

Alto cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# MARCATO

**Marcato is a highly engineered bespoke cubicle solution designed with high-end projects in mind.**

Manufactured from 20mm Solid Grade Laminate (SGL) with vertical edges rebated creating a flush design and a sleek and contemporary appearance for the ultimate appeal.

Marcato is available as 2100mm o/a height as standard but with options to extend to a full floor to ceiling system, offering contractors a range of design possibilities.

Marcato's specially designed flush fronted and rebated finish ensures pilaster panels and doors meet edge to edge for maximum privacy, while the material's waterproof properties make this system an ideal choice for toilet, changing and shower cubicle specifications.

BIM AVAILABLE  
FOR THIS PRODUCT

## Specification

Pilasters and doors: Manufactured from 20mm solid grade laminate (SGL) with vertical edges rebated to create flush finish.

Head rail: Satin anodised aluminium flat bar.

Partitions: Manufactured from 13/20mm solid grade laminate (SGL).

## Fittings and door furniture

Stainless steel fall closed hinges and coat hook, satin anodised aluminium easily operable indicator bolt, full length channels and pedestal legs.

## Dimensions

**Height: 2100mm Floor clearance: 100mm**

**Depth: 1500-1800mm**

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

## Access considerations

Marcato cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

# MARCATO HPL

**Marcato HPL is a highly engineered bespoke cubicle solution designed with high-end projects in mind.**

Manufactured from laminated (HPL) 22mm MR MDF with vertical edges rebated creating a flush design for a sleek finish.

Marcato is available as 2100mm o/a height as standard but with options to extend to a full floor to ceiling system, offering contractors a range of design possibilities.

Marcato's specially designed flush fronted and rebated finish ensures pilaster panels and doors meet edge to edge for maximum privacy.

BIM AVAILABLE  
FOR THIS PRODUCT

## Specification

Pilasters and doors: Manufactured from 22mm MR MDF, edged in matching/complementing hardwood then faced in high pressure laminate (HPL). Vertical edges are then rebated to create the flush frontage.

Head rail: 50 x 10mm SAA flat bar

Partitions: 18mm MR MDF faced on both sides with high pressure laminate (HPL) and then edges either lipped in a matching HPL or 2mm PVC.

## Fittings and door furniture

Stainless steel self-closing hinges, indicator bolt with emergency release facility and buffered coat hook. Satin anodised aluminium full length channels for partition and pilaster fixings.

## Dimensions

**Height: 2100mm Floor Clearance 25mm**

**Depth: 1500mm**

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

## Access considerations

Marcato HPL cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

Where indicated on drawings, outward opening doors to be supplied complete with satin polished stainless steel pull handles to the outside face.

# SEMPRE

---

**Moisture resistant MDF with rebated vertical edges, sprayed to any RAL colour.**

Manufactured from 25mm moisture resistant MDF with rebated vertical edges to create an attractive flush design. The panels are spray painted using our heated spray paint facility to any RAL colour for a professional durable finish.

## **Specification**

Pilasters, doors & partitions: Manufactured from 25mm moisture resistant MDF with rebated vertical edges to create flush design. Panels are then factory sprayed to any RAL colour.

Head rail: Matching 25mm MDF head rail fitted down into top of pilasters.

Partitions: Manufactured from 18mm moisture resistant MDF, then factory sprayed to any RAL colour.

## **Fittings and door furniture**

Stainless steel indicator bolts, sprung hinges, pedestal legs, coat hooks and full length satin anodised channel sections.

## **Dimensions**

**Height: 2150mm**

**Floor clearance: 50mm**

**Depth: 1500mm**

## **Access considerations**

Sempre cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# SENZA

**Its minimalist appearance makes Senza one of the most understated designs in the market.**

The slimline stainless steel pilaster profiles with fully radiused vertical edges, combined with a flat head rail characterise the minimalist design of the Senza cubicle.

Foot supports can also be set back to heighten the floating appearance and the stainless steel circular faceplate complements the linear profiles.

Senza is available in all board types HPL, SGL, glass and veneer to suit any application.

BIM AVAILABLE  
FOR THIS PRODUCT

## Specification

HPL - dry, medium use:

18mm Moisture Resistant MDF with high pressure laminate both sides, edged in either 2mm PVC or matching laminate.

Pilaster: Slimline stainless section with radiused vertical edges.

Head rail: Stainless steel box section or flat bar.

SGL - all uses:

12/13mm Solid Grade Laminate (SGL) with edges machined to a smooth finish.

Pilaster: Slimline stainless section with radiused vertical edges.

Head rail: Stainless steel box section or flat bar.

## Fittings and door furniture

Easily operable stainless steel indicator bolt, pedestal legs, hinges, channel cleats and coat hook.

## Dimensions

**Height: 2100mm Floor clearance: 100mm**

**\*Depth: 1500-1800mm**

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy. With the Senza cubicle system there is the option of having 10mm glass doors - please contact our technical department for details.

## Access considerations

Senza toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

# MEZZO

**Depending on panel material chosen the Mezzo system can be used as toilet, changing and shower cubicles.**

Mezzo cubicles comprise curved aluminium pilasters and head rail with door and division panel options to suit your specific requirements. Typically the cubicle is set out with 150mm floor clearance with the option of down to floor pilasters and divisions where increased privacy is required.

Mezzo is available with a choice of panel including MFC, HPL, solid grade laminate (SGL), veneer and glass.

When cubicle requirements dictate that the cubicle centres need to be greater than 850mm we offer a split pilaster detail 'Mezzo Duet' as an option which allows a 450mm turning circle within the cubicle.

BIM AVAILABLE  
FOR THIS PRODUCT

## Specification

The Mezzo range is available in various material options, to suit any application:

MRC - dry, light use

HPL - dry, medium use

SGL - all uses

Veneer - high end uses

Glass - high end uses

Please contact us for full specification details covering the Mezzo range.

## Fittings and door furniture

Stainless steel 4" butt hinges, channel cleats and coat hook, satin anodised aluminium pedestal legs. All Mezzo cubicles are supplied with an easily operable indicator bolt, type will depend upon cubicle chosen.

## Dimensions

Height: 1950mm Height (overall framework): 2040mm

Floor clearance: 150mm\* Depth: 1500-1800mm

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

## Access considerations

Mezzo cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

\*Cubicles with a depth >1500mm subject to material selection and surcharge.

# INTERMEZZO

**Intermezzo offers a fully enclosed solution that is suitable for all washrooms and changing rooms requiring high levels of privacy whilst remaining commercially viable.**

Manufactured from SGL for unparalleled durability with floor to ceiling aluminium pilasters providing a stylish rigid structure, Intermezzo ticks all the boxes for the modern school's washroom requirements.

Partitions are extended to the floor and the ceiling with overhead panels above the door providing complete visual privacy to the user.

## **Specification**

12/13mm Solid Grade Laminate (SGL) with edges machined to a smooth finish.  
Pilaster: Satin anodised aluminium aerofoil sections.

Head rail: Satin anodised aluminium aerofoil section (if required).

## **Fittings and door furniture**

Stainless steel 4" butt hinges and coat hook, satin anodised aluminium full length channels and easily operable cast plastic indicator bolt.

## **Dimensions**

**Height:** up to 2700mm, dependent on material chosen

**Floor clearance:** 20mm (door undercut)

**\*Depth:** 1500-1800mm

## **Access considerations**

Intermezzo toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

**\*Depending on materials chosen, cubicles with a depth  $\geq$ 1500mm subject to material selection and surcharge.**

# FORTE

**Designed for use within wet and dry areas, Forte is the perfect cubicle for use in schools and any other environment subject to high traffic. As solid grade laminate (SGL) is totally impervious to water, Forte can be used as shower and wet area changing cubicles.**

Forte cubicles are manufactured from 12/13mm solid grade laminate (SGL), an extremely robust and waterproof material. Combined with a contemporary continuous head rail for excellent lateral stability Forte cubicles offer an affordable and long term solution to your washroom requirements.

BIM AVAILABLE  
FOR THIS PRODUCT

#### Specification

12/13mm Solid Grade Laminate (SGL) with edges machined to a smooth finish.

#### Fittings and door furniture

Stainless steel 4" butt hinges, channel cleats and coat hook, easily operable cast plastic indicator bolt, 'D' shaped satin anodised aluminium head rail and pedestal legs.

#### Dimensions

Height: 1950mm Floor clearance: 150mm \*Depth: 1500-1800mm Floor to ceiling cubicles up to 3000mm are available.

#### Access considerations

Forte toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

\*Cubicles with a depth >1500mm subject to material selection and surcharge.

# BASSO

---

**The Basso system provides a stylish and cost effective solution for washroom and retail change projects within a limited budget.**

Toilet cubicles and change cubicles with integral benching are both available with inward or outward opening doors.

Basso cubicles comprise 19mm moisture resistant melamine faced chipboard (MFC) panels edged all round in a PVC lipping, supported laterally by a unique aerofoil profiled head rail.

With the division panels supported on architecturally designed satin anodised aluminium pedestal legs, Basso toilet cubicles are a cut above other budget systems available.

# ARIA

---

**A higher specification than the Basso system, the Aria range incorporates laminated MDF for all panels, providing greater durability while offering practicality and value for medium traffic areas in schools, commercial offices and the industrial sector.**

Providing increased impact resistance, Aria cubicles are manufactured from high pressure laminate bonded to 18mm MDF core, lipped with either matching laminate or corresponding PVC edging.

BIM AVAILABLE  
FOR THIS PRODUCT

#### Specification

Basso: 19mm MFC. Aria: Laminated HPL.  
Canto: Laminated HPL with post formed vertical pilaster edges.  
Please contact us for further information.

#### Fittings and door furniture

Stainless steel 4" butt hinges, channel cleats & coat hooks, easily operable indicator bolts with either SAA or Stainless steel pedestal legs.

#### Dimensions

Height: 2100mm as standard (full height up to 3000mm)  
Floor clearance: 150mm  
Depth: 1500-1800mm

#### Access considerations

Aria cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# CANTO

**With impact resistant HPL panels Canto post formed cubicles are well suited to the medium traffic areas of schools, offices and the industrial sector.**

Toilet cubicles and dry/retail change cubicles with integral benching are both available with inward or outward opening doors.

Providing increased impact resistance, Canto cubicles are manufactured from high pressure laminate (HPL) bonded to 18mm MDF core. Lipped with either matching laminate or corresponding PVC edging, the Canto range features post formed (rounded) vertical edges to the pilasters to create an attractive and effective cubicle solution.

Canto post formed is offered with either a satin anodised aluminium head rail, or a post formed insert to match the pilaster detail.

# FRUTTI

---

**Frutti is a free standing cubicle system in solid grade laminate (SGL) for maximum durability. In place of a head rail the pilasters are supported by a floor mounted bracket for added rigidity.**

Using the latest manufacturing technology, the panels can be machined to produce the impression of a range of different fruits. Combined with different colours, and digital or screen print options, it has never been easier to make a fun washroom to encourage regular use.

**BIM AVAILABLE  
FOR THIS PRODUCT**

#### **Specification**

12/13mm Solid Grade Laminate (SGL) with edges machined to a smooth finish.

#### **Fittings and door furniture**

Stainless steel 4" butt hinges, floor mounted stability bracket and satin anodised aluminium full length channels.

#### **Dimensions**

**Height:** 1200mm

**Floor clearance:** 150mm (under door only)

**Depth:** 1500-1800mm

Other sizes are available.

#### **Access considerations**

Frutti toilet cubicles are available in configurations to comply with approved Document M.

# BAMBINO

**Bambino is a full sized cubicle with reduced height doors to facilitate supervision and to alleviate any intimidation that a standard cubicle may impose on young children.**

Manufactured from solid grade laminate (SGL), Bambino cubicles combine a front mounted head rail with sweeping curves to the doors.

The pilasters are also radiused to soften the visual impact and provide a unique aesthetic.

The removal of right angles can be mirrored in the duct access panelling and vanity underpanel design to culminate in a washroom unlike any other.

BIM AVAILABLE  
FOR THIS PRODUCT

## Specification

12/13mm Solid Grade Laminate (SGL) with edges machined to a smooth finish.

## Fittings and door furniture

Stainless steel 4" butt hinges, coat hook, pedestal legs with easily operable cast plastic indicator bolt, full length satin anodised aluminium channels and solid grade laminate (SGL) head rail straps.

## Dimensions

**Height: 2075mm to top of pilaster**

**Floor clearance: 150mm**

**\*Depth: 1500mm - 1800mm**

The heights quoted above are for guidance only. Washrooms designed for younger or older children may require shorter or taller doors. Bambino is available to suit your requirements.

## Access considerations

Bambino toilet cubicles are available in configurations to comply with approved Document M complete with outward opening doors.

A stainless steel pull handle is supplied to the outside face of all outward opening doors as standard. Complementary grab rails are also available.

**\*Cubicles with a depth  $\geq$ 1500mm subject to material selection and surcharge.**

A photograph of a row of modern shower cubicles in a public restroom. The cubicles have white doors with black handles and are set against walls of light-colored square tiles. The floor is made of large, dark grey tiles. The lighting is soft and even, highlighting the clean and functional design of the fixtures.

# SHOWER CUBICLES

---

With a choice of toughened back-painted low iron glass, solid grade laminate or cast acrylic, all of which can be specified in a variety of different colours, our shower cubicles are the perfect fit, whatever your requirements.

---

## RANGES

---

Luminoso Acrylic	54
Luminoso Glass	56
Marcato	58
Forte	60
Mezzo	62
Mezzo Aqua	64

---

# LUMINOSO ACRYLIC

**Luminoso's cast acrylic construction is ideal for both private and public shower facilities, providing a uniform appearance to both sides of the panels for a more polished overall appearance.**

With many different textures and colours available, together with more opaque options, Luminoso Acrylic offers a striking solution for the shower area. A range of acrylic colours are available and subject to minimum order quantities.

**BIM AVAILABLE  
FOR THIS PRODUCT**

## **Specification**

Pilasters, doors and partitions: 12mm Green Cast Acrylic with edges machined to a smooth finish.

Head rail: Stainless steel tubular head rail.

## **Fittings and door furniture**

Chrome nickel plated double swing hinges (self closing from 25 degrees), stainless steel channel cleats, and coat hook, pull handle to the outside of each door and stainless steel pedestal legs.

## **Dimensions**

**Height: 2026mm**

**Floor clearance: 80mm**

**Depth: Max 1500mm**

## **Access considerations**

Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# LUMINOSO GLASS

**Luminoso Glass is an alternative shower cubicle to the popular acrylic option.**

Similar in style to Luminoso Acrylic, but featuring high specification 10mm clear float toughened glass for the doors, pilasters and division panels, in lieu of acrylic.

BIM AVAILABLE FOR THIS PRODUCT

## Specification

Pilasters, doors and partitions: 10mm clear float toughened glass with 100% white screenprint to the reverse of each panel. Low iron glass is also available to achieve a clear glass finish, rather than the green tinge of standard glass.

Head rail: Stainless steel tubular head rail.

## Fittings and door furniture

Chrome nickel plated double swing hinges (self closing from 25 degrees), stainless steel channel cleats, and coat hook, pull handle to the outside of each door and stainless steel pedestal legs.

## Dimensions

Height: 2026mm

Floor clearance: 80mm

Depth: Max 1500mm

## Access considerations

Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# MARCATO

**A highly engineered cubicle designed with high specification projects in mind.**

Marcato's specially designed flush fronted and rebated finish ensures pilaster panels and doors meet edge-to-edge for maximum privacy and the waterproof properties of the solid grade laminate (SGL) make it an ideal choice for shower areas.

Available as 2100mm o/a height as standard, we also offer the option to extend to a full height floor to ceiling system, with minimal floor clearance for increased privacy.

**BIM AVAILABLE  
FOR THIS PRODUCT**

## **Specification**

Pilasters: Manufactured from 20mm solid grade laminate (SGL) with vertical edges rebated to create flush finish.

Doors: Manufactured from 20mm solid grade laminate (SGL) with vertical edges rebated to create flush finish.

Head rail: Satin anodised aluminium flat bar.

Partitions: Manufactured from 13/20mm solid grade laminate (SGL).

## **Fittings and door furniture**

Stainless steel fall closed hinges and coat hook, stainless steel easily operable indicator bolt, full length channels and pedestal legs.

## **Dimensions**

**Height: 2100mm**

**Floor clearance: 100mm**

**Depth: 1500-1800mm**

## **Access considerations**

Marcato cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# FORTE

**Impervious to water, Forte is ideal for shower and wet area changing cubicles.**

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

BIM AVAILABLE  
FOR THIS PRODUCT

## **Specification**

Pilasters, doors and partitions: 12/13mm solid grade laminate (SGL) with edges machined to a smooth finish.

Head rail: 'D' shaped satin anodised aluminium.

## **Fittings and door furniture**

Stainless steel 4" butt hinges, channel cleats and coat hook, easily operable indicator bolt and satin anodised aluminium pedestal legs.

## **Dimensions**

**Height: 1950mm**

**Floor clearance: 150mm**

**Depth: 1500-1800mm**

## **Access considerations**

Forte cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# MEZZO

---

**Mezzo cubicles comprise curved aluminium pilasters and head rail with door and division panel options to suit your specific requirements. Typically the cubicle is set out with 150mm floor clearance with the option of down to floor pilasters and divisions where increased privacy is required.**

Mezzo is available with a choice of solid grade laminate (SGL) or glass panels.

When cubicle requirements dictate that the cubicle centres need to be greater than 850mm we offer a split pilaster detail 'Mezzo Duet' as an option which allows a 450mm turning circle within the cubicle.

BIM AVAILABLE  
FOR THIS PRODUCT

#### Specification

Pilasters and head rail: Satin anodised aluminium aerofoil section.

Doors and partitions: 12/13mm solid grade laminate (SGL) with edges machined to a smooth finish.

#### Fittings and door furniture

Stainless steel 4" butt hinges, channel cleats & coat hooks, easily operable stainless steel indicator bolts with stainless steel pedestal legs.

#### Dimensions

Height: 1950mm

Height (overall framework): 2040mm

Floor clearance: 150mm

Depth: 1500-1800mm

#### Access considerations

Mezzo cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# MEZZO AQUA

**Designed with the leisure industry in mind, Mezzo Aqua provides an elegant solution for shower areas.**

Split front pilasters provide a combination of stability and aesthetics and the glass infill panels can be screenprinted in almost any RAL colour to contrast or co-ordinate with the glass doors.

The external towel rail to the door demonstrates attention to detail, not only keeping the towel out of the wet but also indicating which cubicles are occupied.

## **Specification**

Pilasters and head rail: Satin anodised aluminium aerofoil section.

Doors and partitions: 10mm clear float toughened glass with 100% white screenprint to reverse, with all glass panels to have a 5mm radius to each corner.

## **Fittings and door furniture**

Stainless steel specially designed glass hinges, channel cleats and coat hook, and satin anodised aluminium pedestal legs.

## **Dimensions**

Height: 1950mm Height (overall framework): 2040mm  
Floor clearance: 150mm Depth: 1100-1500mm

Optional floor to ceiling cubicles are also available with minimal floor clearance for increased privacy.

## **Access considerations**

Mezzo Aqua cubicles are available in configurations to comply with approved Document M complete with outward opening doors. Our standard stainless steel pull handle is supplied to the outside face of all outward opening cubicle doors. Complementary grab rails are also available.

# CHANGING CUBICLES

Designed with durability in mind, our solid grade laminate changing cubicles offer a flexible solution for changing rooms. Available in a wide range of colours and finishes, they can be designed to suit any changing room area.

# BENCHING

---

Defining the standard for changing room benching solutions.

---

## ON SHOW

---

Bespoke 74

Legato 76

---

# BESPOKE

---

**Benching can be manufactured to suit individual design and performance requirements.**

Our bespoke benching service provides our clients with a project led service where materials, finishes and constructions can be tailored to meet individual requirements.

Benches can be manufactured from a number of materials to suit your needs. Please contact our design department for further assistance.

# LEGATO

**A totally new design concept, the Legato bench is available either freestanding or wall-mounted.**

It comprises an aluminium support construction with a wide range of profiled seating options together with complementary solid grade laminate (SGL) hookrail. There is also the option to specify a satin anodised aluminium hookrail which can incorporate both top and bottom mounted hooks.

This benching system also caters for a shoe rack underneath the seat if required as an optional extra.

**BIM AVAILABLE  
FOR THIS PRODUCT**

## Specification

Supports manufactured from satin anodised aluminium sections with floor adjustment. Bench styles include floor mounted to wall, floor mounted island, wall mounted (cantilevered) and full island with high level hookrails.

## Seat options

Type A - single 300mm wide seating plank is manufactured from 12/13mm solid grade laminate (SGL).

Type B - single seating plank machined with integral slots for slatted appearance, maintaining much of the strength of a single piece. 300mm wide, manufactured from 12/13mm solid grade laminate (SGL).

Type C - comprises three individual hardwood slats 30mm thick x 90mm wide. Finished with two coats of AC lacquer.

## Hookrails

Complementary solid grade laminate (SGL) hookrail with buffered stainless steel hooks or optional satin anodised aluminium section with captive hooks.

## Dimensions

**Height: 450mm (top of seat)**

**Width: 300-650mm**

Legato benching is manufactured to suit your specific requirements including the current recommendations of Sport England i.e. 450mm wide x 480mm high.

Solid Grade Laminate	92
Glass	94
High Pressure Laminate	96
Silestone	98
Concrete	100
Zodiaq	102

---

# SOLID SURFACING

---

**Solid surface materials lend themselves to being cut, bent and joined to a seamless smooth finish.**

Solid surfacing is the generic name given to materials such as Corian which are an advanced blend of pure acrylic polymer, pigments and natural mineral fillers.

Hygienic and durable, solid surface vanities are manufactured to a seamless, natural stone-like appearance, providing a luxury finish which is equally hardwearing and easy to maintain.

Supplied in sheets generally 12mm thick with the colour and pattern running consistently all the way through, solid surface materials can be cut to any shape, bent and joined with inconspicuous seams to produce a perfectly neat and unified appearance.

BIM AVAILABLE  
FOR THIS PRODUCT

# GRANITE & MARBLE

---

**Offering all the luxury of a natural material which is as hardwearing as it is beautiful, both granite and marble are perfect for the most exclusive washrooms.**

Arpeggio granite and marble vanities are available in a range of finishes which are defined with rich veining that reflects the beauty of natural stone to add a luxurious finish to your washroom.

BIM AVAILABLE  
FOR THIS PRODUCT

# SOLID GRADE LAMINATE

---

**Ideal for hard-working washroom environments, Arpeggio solid grade laminate (SGL) vanities offer extreme impact resistance, are impervious to water and are highly resistant to vandalism.**

To ensure total design flexibility the Arpeggio solid grade laminate vanities are available in a range of colours to co-ordinate or contrast with cubicles and can be installed in both wet and dry areas.

BIM AVAILABLE  
FOR THIS PRODUCT

# GLASS

---

**Glass vanities provide a minimalist, contemporary solution for the washroom.**

Manufactured from 19mm toughened glass, our Arpeggio glass vanity tops can be supplied clear or sandblasted for an etched decor.

Ideal for high specification environments, the safety glass incorporates polished edges for a distinctive, hardwearing and safe solution.

Ideal for contemporary washrooms, Arpeggio glass vanities will complement any cubicle option and are ideal when specified with co-ordinating Alto Kristalla glass cubicles.

BIM AVAILABLE  
FOR THIS PRODUCT

# HIGH PRESSURE LAMINATE

---

**Manufactured from 18mm moisture resistant MDF with high pressure laminate to both sides, Arpeggio HPL vanities are an economic option for areas less prone to heavy wear. A wide selection of profiles is available to suit a range of applications.**

For increased durability the long edges are post formed to create rolled edges and exposed ends are capped with moisture resistant MDF and laminated to match the face colour.

Timber frame or wall hung cantilever brackets are available in complementary materials along with underpanels to match or contrast with the vanity top.

Arpeggio HPL vanities are available with a range of taps and basin options and in a choice of colours.

BIM AVAILABLE  
FOR THIS PRODUCT

# SILESTONE

---

**Manufactured from 90% natural quartz, Silestone is highly durable and resistant to scratches. And with its low-level fluid absorption, anti-bacterial properties and stain resistance, Silestone is ideally suited to use as a washroom vanity.**

Arpeggio Silestone vanities are available to specify in a range of over 60 stunning multi-faceted colours.

BIM AVAILABLE  
FOR THIS PRODUCT

# CONCRETE

---

**Concrete is the ideal material for an industrial-inspired urban design theme.**

No longer seen as a purely functional building material, reserved solely for industrial applications, concrete has become increasingly popular for a wide range of applications from reception desks to vanity units. As well as being hardwearing and easy-to-maintain, concrete vanities can be used to create a stylish high specification look.

Concrete can be pre-cast and moulded into almost any shape to create a vanity unit bespoke to your project.

Arpeggio Concrete vanities are available in a choice of finishes with a range of inset or countertop basins.

**BIM AVAILABLE  
FOR THIS PRODUCT**

# ZODIAQ

---

**Manufactured by DuPont, Zodiaq is the original quartz surface material.**

Zodiaq is an advanced composite material made up of 93% Quartz, DuPont proprietary binding polymer and pigments developed for one purpose; to create a material with its own depth and character.

Zodiaq catches and reflects light, capturing the radiance of Quartz crystal. Zodiaq also has unusual clarity and consistency of colour, qualities which combine with exceptional strength and durability.

In addition to over 20 striking quartz colours, Zodiaq also offers an alternative to the polished finish with concrete block, a collection of stylish matt finish colours in natural tones inspired by classic urban architectural materials.

# DUCT PANELLING

---

Integrated duct panelling systems conceal unsightly services while offering easy access for future maintenance.

We can also create unique duct panel designs tailored to your washroom area with our bespoke service which draws on a huge range of materials, finishes and colours to complement or contrast effortlessly. And with the option to apply digitally screen-printed graphics to the face or specialist back-painted glass panels, the possibilities are almost limitless.

For more information please contact us on  
0800 999 8888

# CONCERTO

---

**Constructed with a supporting 60mm x 44mm pressure treated softwood timber framework complete with plywood skirting and header, the Concerto system can be supplied as a prebuilt frame or alternatively timbers can be notched ready to receive the plywood skirting and header rail on site.**

Concerto is available with panels manufactured using a wide variety of materials and finishes all supplied with corresponding 12mm laminate (unless specified otherwise) to create the flash gaps.

The panels are fitted securely to the framework by means of high quality Hafele push on/lift off brackets, designed to allow access where required for future maintenance and repair. Hinged and lockable panels are also available.

Please note - Where a prebuilt timber frame is specified, we need to first be in receipt of accurate dimensions.

# META

**With a supporting pre-assembled aluminium framework manufactured from pressed aluminium section with an extruded aluminium fixing channel, Meta offers a high specification, robust finish.**

Meta is available to suit any specification using panels manufactured in a wide variety of materials, finishes and colours, all supplied with corresponding 12mm laminate (unless specified otherwise) to create the flash gaps.

The panels are fitted securely to the framework by means of high quality Hafele push on/lift off brackets, designed to allow access where required for future maintenance and repair. Hinged and lockable panels are also available.

Please note – Where a prebuilt aluminium frame is specified, we need to first be in receipt of accurate dimensions.

# HIGH PRESSURE LAMINATE

The Laminate duct panels are manufactured from 18mm MR MDF faced on one side with high pressure laminate (HPL) balanced on the reverse. The edges are lipped in either a matching HPL or alternatively a 2mm PVC edge.

BIM AVAILABLE FOR THIS PRODUCT

# SOLID GRADE LAMINATE

**Solid grade laminate duct panels are manufactured from 12/13mm Solid Grade Laminate (SGL), sometimes referred to as 'Compact Laminate'. The edges are machine finished either with bevelled or crescent edges. In wet areas, solid grade laminate can also be applied directly to the face of the frame in place of the high pressure laminate to create the flash gaps in order to prevent water ingress.**

BIM AVAILABLE  
FOR THIS PRODUCT

# GLASS

---

**Glass duct panels are manufactured with either 6mm clear float toughened screen printed glass or 6mm back painted glass bonded to a 12mm moisture resistant MDF. Edges can be capped in a small satin anodised aluminium angle to give added edge protection.**

Where sanitary items are required to be fitted to the glass, we introduce an independent pattern panel which is fitted to the support framework behind and is approximately 3mm thicker than the thickness of the glass. The sanitaryware either does not come into contact with or is fitted directly to the glass.

BIM AVAILABLE  
FOR THIS PRODUCT

# SOLID SURFACE

Corian duct panels are manufactured from either 6mm or 13mm Corian solid surface material which is bonded to a suitable substrate with the edges also lipped in Corian.

BIM AVAILABLE FOR THIS PRODUCT

# REAL WOOD VENEER

**Real wood veneer duct panels are manufactured from 18mm MR MDF, with the edges being lipped first with a matching 7mm hardwood. The face veneer is applied and balanced on the reverse. The panels then receive a two part AC lacquer to provide a long-lasting durable finish (different levels of finish are available). Rather than high pressure laminate, the real wood veneer is applied to the face of the frame to create the flash gaps.**

BIM AVAILABLE  
FOR THIS PRODUCT

# ALUMINIUM

**The aluminium duct panels comprise 12mm MR MDF faced on one side with 3mm satin anodised aluminium sheet balanced on the reverse. The edges are capped in 1.5mm satin anodised aluminium angle.**

BIM AVAILABLE  
FOR THIS PRODUCT

# GRANITE

---

**Granite ducting is generally applied to a timber support frame. The framework is built on site and once complete, templates are made for each piece of granite. The granite is then made to mimic the templates to ensure a perfect fit.**

Removable access panels will be bonded to a substrate to allow fixing clips to be fitted. The panels are either bonded to the support framework or fitted with the correct fixing clips, allowing access where required.

# TILED

**Our timber framework is built using 18mm plywood ready to be tiled by other contractors.**

# A BESPOKE SOLUTION

---

**We pride ourselves on our bespoke approach to design.**

We'll work with you to create the perfect solution and, with an almost limitless range of materials, finishes and colours available to specify from, we're confident you'll find exactly what you're looking for. We can tailor our products to fit your exacting requirements and specification.

If you're looking for a washroom design to mirror other common areas in a building, we can source complementary materials from real wood veneers to back-painted glass to provide as close a match as possible.

What makes a washroom design outstanding is the attention to detail - those finishing touches and unique elements that make your washroom space different. Whether that's a custom-made vanity unit, inset iPad holder, or bespoke handbag shelf, our washrooms are designed around you.

# SPECIALIST JOINERY

**Our specialist joinery department excels in creating designs which are totally individual and bespoke.**

We have many years' experience of managing high quality contracts involving bespoke joinery requirements, from reception counters to the refurbishment of common areas.

With the benefit of a technically advanced in-house joinery facility and highly skilled team of craftsmen, you can be sure that your bespoke project requirements will be constructed, installed and managed by a team that appreciates quality and will work with you to meet your expectations.

Where a totally integrated and comprehensive joinery solution is required, the expertise of our partner company Cre8 Joinery Solutions can be utilised to ensure the most comprehensive and professional solutions for your project.

# ACCESSORIES

---

**Working closely with industry leading manufacturers including Allgood, d line, Dolphin, The Splash Lab and Saneux, we're able to offer an unrivaled range of high quality washroom accessories from door handles, locks and flushes, to taps, soap dispensers and bins.**

# TEGO MIRROR

**Tego is a hinged mirror system providing a neat and compact hidden storage solution.**

Ideal for vanity essentials such as paper towels, liquid soap, taps, electrical points and cleaning agents, Tego is flexible in both size and finish.

## **Carcass**

18mm Grey Melamine faced MDF (MFMDf), edges lipped with PVC.

## **Hinged Panel**

6mm safety backed mirror bonded to 18mm MFMDf substrate.

## **Fixings**

Gas struts, stainless steel butt hinges.

## **Dimensions**

Up to 1700mm wide per unit.

Accessories within the unit TBC from a range of suppliers.

# PROJECTS

—

Established in 2001, Washroom has grown to become one of the leading providers of high specification commercial washrooms, toilet and shower cubicles, vanities, lockers and benching together with a bespoke joinery service for sectors including commercial, health, leisure, education and the public sector.

The following project highlights represent only a small selection of the wide range of innovative projects we have delivered.

---

Westfield White City	156
Heddon Street, London	158

---

## 2 MORE, LONDON

---

This office building forms part of the More London complex of offices, retail units and restaurants close to London Bridge. The sleek new washrooms we delivered were designed with a minimal colour palette of natural oak and black. Our popular full height Alto toilet cubicles were finished with a natural oak real wood veneer and completed with matt black ironmongery including the striking vertical flat iron bar pull handles. Our Arpeggio solid surface Corian vanities were manufactured in a light grey shade to provide contrast to the black recessed sinks and tiled splashback while the underpanels were finished using the same natural oak veneer as the toilet cubicles.

## 155 BISHOPGATE

---

These contemporary new washrooms feature a mix of concrete and Fenix laminate which both add depth to the industrial chic design. Our full height Alto FENIX toilet cubicles were specified in a deep blue colour with bespoke mouldings and brass effect hardware. As well as being ultra matt and soft to the touch, Fenix laminate also brings with it numerous high-performance benefits including being impact resistant, hydro repellent and thermally self-healing. Complementing the cubicles are the bespoke concrete vanities which we manufactured complete with circular ceramic countertop sinks matching the circular mirrors and pendant lighting above.

## 6 DUKE STREET, MARYLEBONE

---

This office in the heart of London's Marylebone district has been completely remodelled to Grade A standard. The new Your Space superloos, which we installed on each floor, were the ideal way to maximise the available space. Each cubicle includes a bespoke Corian vanity unit with integrated waste bin and Concerto integrated duct panelling faced with 6mm toughened, back-painted glass. Our full height Alto toilet cubicle doors were finished in stained Koto veneer while matt black powder-coated ironmongery completes the sleek minimalist style.

## BARRY'S BOOT CAMP, VICTORIA

---

This is the fourth branch the luxury gym brand has opened in London and the second we've delivered eye-catching luxury shower and changing rooms for. We manufactured our Luminoso glass shower cubicles with bespoke saloon style cubicle doors specifically for Barry's Boot Camp to create a sleek contemporary finish without external door pull handles. The unique cubicles were completed with black finish ironmongery to complement the black tiles around the showers. We also designed and installed bespoke Corian vanity units and grooming shelves, which were manufactured in the dark grey and heavily veined 'Cosmos Prima' colour, adding to the industrial-chic style of the changing area.

## DASHWOOD HOUSE

---

The new washrooms we delivered for Dashwood House centre around the natural aesthetic of wood and stone, while using innovative man-made materials. The Concerto duct panelling, which was completed with a brass trim, was faced with white marble effect solid surface Silestone, while solid surface Corian in a limestone finish was used for the vanities. Our full height Alto Laminate toilet cubicles were faced in EGGER laminate in the 'White Halifax Oak' finish - a distressed oak effect that's exceptionally close to real aged oak. EGGER laminate is also abrasion, impact and scratch resistant and offers antibacterial properties.

## ROGER STREET, LONDON

---

This fully refurbished three storey building provides multi-tenant office space in London's Bloomsbury district. The distinctive washrooms were designed to reflect the building's character with its external brick facade with the brick-effect tiled wall running floor to ceiling behind the vanities setting the tone perfectly. Our Tego hinged mirror system, which we installed above the white Arpeggio Corian vanities and fixed to the feature wall by means of a bespoke black metal framework adds to the unique washroom space. Our full height Alto toilet cubicles were faced in real oak veneer with black ironmongery to complete the washroom.

## THIRD SPACE CITY CLUB

---

This is one of several projects we've completed for the luxury London-based health club - each with a totally different unique design. The changing areas at Third Space City feature our Luminoso glass shower cubicles, back-painted in white and completed with matt black ironmongery. We also manufactured bespoke black and white marbled effect stone vanity units as well as solid surface make-up units. Our Alto Laminate full height toilet cubicles were finished with a bespoke copper effect laminate while our Concerto duct panelling was faced with a brushed stainless steel effect laminate for a finish which is as hardwearing as it is aesthetically pleasing.

## HAMMER HOUSE, LONDON

---

Originally home to Hammer Film Productions in the 1950s, Hammer House now provides modern office space but its name and Art Deco inspired entrance hall offer a subtle homage to its past. Here the washrooms needed to be modern while also reflecting the heritage of the building. The bespoke white Alto Laminate full height toilet cubicles were manufactured with timber mouldings around the edge of each door which together with the muted matt finish of the brass ironmongery fits perfectly as part of the period inspired washroom design.

## 88 WOOD STREET

---

This project was a true collaboration, bringing washroom and joinery elements together. The new washroom areas feature a bespoke island vanity unit, manufactured from a white solid surface worktop with countertop ceramic sinks plus wood effect laminate underpanels to match the toilet cubicles. We also installed the large square suspended mirrors directly above the vanity unit and bespoke benching in the shower cubicles. Our partner company, Cre8 Joinery Solutions, delivered the joinery for the reception area including a new reception desk, retail bar and bespoke dog bone table, all of which were manufactured from bespoke terrazzo tops.

## PARK HOUSE

---

The contemporary new washrooms and staff shower and changing area installed at this Mayfair office feature innovative materials and bespoke accessories to create a luxurious finish. Our Alto Laminate full height toilet cubicles were faced with Formica walnut effect laminate with discreet stealth self-closing pivot hinges and bespoke, specially procured architectural pull handles. The same bespoke handles and hinges were also used on our large Alto FENIX shower and changing cubicles. The bespoke Arpeggio Corian solid surface vanities in designer white feature individual recessed sinks and integrated waste bins while our Tego hinged mirrors provide a neat and compact hidden storage solution.

## SHERBOURNE HOUSE

---

We delivered new washrooms plus a staff shower and changing area to mirror the reception area of this building, which our partner company Cre8 Joinery Solutions was instrumental in creating. The Your Space superloos installed feature our Alto cubicles finished in the same walnut veneer seen throughout the reception. The bespoke Arpeggio vanity and Concerto duct panels in each cubicle were manufactured from dark grey Dekton, with the duct panels trimmed with copper to match the copper ironmongery. In the shower areas we installed cantilevered solid walnut benches, walnut veneered towel drop units as well as our Forza lockers, which were completed with a walnut veneer surround.

## 40 GROSVENOR PLACE

---

Located just opposite Buckingham Palace gardens, 40 Grosvenor Place is a prestigious office building which demanded exceptional washrooms. Our full height Alto toilet cubicles feature unique vertical oak hardwood slats as part of the door and pilaster construction, with the cubicle locks and hinges all recessed to create a flush facade but with depth and texture. Our Concerto ducting was faced with Domus panels in a white and grey veined marble finish with the same oak hardwood slats providing a frame and mirroring the toilet cubicle design. The bespoke Arpeggio solid surface Corian vanities include pull out drawers for waste bins and oak veneer underpanels and our Tego hinged mirror system above also features the same oak edging.

## 5-9 CORK STREET, MAYFAIR

This extensive refurbishment was carried out behind the existing facade of the building, upgrading the interior for retail and office use. Rather than a traditional washroom layout, a superloo design was specified to maximise space within the tight footprint of the building. Each self-contained Your Space superloo cubicle includes a WC, Silestone trough style vanity unit with integral cupboards and back-painted glass upstand with stylish bronze hexagonal pattern, and a Dolphin Alavo mirror system. The Concerto integrated duct panels also installed were faced with back-painted glass in grey behind the WCs and white with bronze metal vertical sections beneath the vanity unit. The building's new staff shower area features our high specification glass iLockers, back-painted to a light grey colour and solid grade laminate Legato bench units also in light grey.

## PRINCIPAL TOWER

---

This is an extraordinary new complex including a mix of retail, restaurants, residential accommodation and high-quality office space in the heart of Shoreditch. We delivered high specification washrooms for the office facilities, featuring our full height Alto Kristalla toilet cubicles, back-painted in white with solid surfacing edges, our Concerto integrated duct panels which were faced with the same back-painted glass and Arpeggio marble vanity units. For the staff shower and changing area in the basement, we installed our Legato benches in grey and Forza solid grade laminate lockers in white - keeping the colour palette across all washroom areas to a minimum for a contemporary feel.

## WESTFIELD WHITE CITY

---

The new mixed-use building at Ariel Way features four floors of high spec executive office space and we installed new washrooms on all four levels. The bespoke design features our Alto full height toilet cubicles, faced with white solid surface Corian and completed with oversized vertical pull handles which stretch almost from floor to ceiling. We also installed individual Arpeggio vanity units, manufactured using solid surface Corian in a grey natural stone finish. Each unit features a square countertop ceramic sink, wall-mounted taps and a shelf with inset paper towel disposal and inlaid wood to match the cubicle door handles.

## HEDDON STREET, LONDON

---

This Grade II Listed former cinema in the heart of Mayfair has been sensitively refurbished and converted into a modern serviced office. We delivered new washrooms on all five levels and with space at a premium we created a mix of layout options utilising our Your Space superloo cubicles on some levels. We installed marble faced Concerto duct tiled panelling complete with brass trim to match the vanity splashbacks and complement the brass accessories. Our above sink Tego hinged mirror system also features curved edges to reflect the sink shape and are backlit to provide soft lighting.
